Slope Intercept form $y = mx + b$

m: Slope

b: y-intercept

Finding Slope from 2 points $\frac{y_2 - y_1}{x_2 - x_1} = \text{Slope}$

Volume of Cylinder $V = \pi \cdot r^2 \cdot h$

Volume of Cone $V = \frac{1}{3} \cdot \pi \cdot r^2 \cdot h$

or

$\frac{\pi \cdot r^2 \cdot h}{3}$ or $\pi \cdot r^2 \cdot h \div 3$

* All of these are the same

Volume of Sphere $\frac{4}{3} \cdot \pi \cdot r^3$
